Lise Tucker
Business Administrator

Kevin P. Verratti
Director of Technology

Technology School Board Report
9/6/2016

- Recycled approximately 50 systems from both FRES and WLC with a local recycling company. As staff have returned from summer break, systems have been pulled out of closets and cabinets so I anticipate another recycling run shortly.
- Every classroom and every computer in the district was checked before school started to ensure technology was ready for teachers upon their return.
- Surveyed the wireless networks at all locations to identify any deficiencies prior to school starting.
- Updated all computer labs with new software and prepared for NWEA/MAPS testing for second week of school.
- Prepared 230 Chromebooks to grades 3,4,6,8,9 and the systems were ready for the first day of school. Training was provided over the summer before school started.
- Replaced WLC Media Center Lab with new computers, systems were ready for the first day of school and students began using them before school started on the first day.
- Upgraded and Migrated Library Catalog at both FRES and WLC to a cloud based single system with a joint catalog. Training was provided to staff on the new system.
- Powerschool was upgraded to Version 10, training was provided to staff on the new gradebook functions.

Respectfully,

Kevin Verratti
Director of Technology
